SUBJECT INDEX

Ab initio calculations
On the energy barrier for 1,2-elimination of methane from the dimethyloxonium cation R11
Absorption and fragmentation pathways
Multiphoton and electron impact ionization of manganese decacarbonyl $Mn_2(CO)_{10}$ at 351, 248 and 193 nm. Wavelength dependent competition between ionization and dissociation 157
Accelerating field
A time-of-flight mass spectrometer with an accelerating field in the reflecting system 37
Acetylene
Intracluster ion/molecule reactions in acetylene and water systems 11
Reactions of $C_2H_2^{\cdot+}$ with $CF_3COOC_2H_5$, $ClCH_2CN$ and CH_3OH: the bond energy $D(C_2H–H)$ R21
Acidities of alcohols
The fragmentation of proton-bound cluster ions and the gas-phase acidities of alcohols 115
Acidity
First steps towards a gas-phase acidity ladder for derivatized fullerene dications 145
Alkaloids
Surface ionization mass spectrometry of biomolecules: amino acids, purine bases, alkaloids 45
Amino acids
Surface ionization mass spectrometry of biomolecules: amino acids, purine bases, alkaloids 45
Analytical applications
Selective fragmentation and ionization of organic compounds using an energy-tunable rare-gas metastable beam source 69
Appearance energies
Multiphoton and electron impact ionization of manganese decacarbonyl $Mn_2(CO)_{10}$ at 351, 248 and 193 nm. Wavelength dependent competition between ionization and dissociation 157
Ashphaltenes
Measurement of molecular weight distribution of a complex system using mass spectrometry. Part 2. The recovery of fragmentation 215

Bicarbonate
Charge reversal (CR) and neutralization reionization ($^-NR^+$) mass spectrometry of bicarbonate and bisulfite ions R7
Biomolecules
Surface ionization mass spectrometry of biomolecules: amino acids, purine bases, alkaloids 45
Bisulfite
Charge reversal (CR) and neutralization reionization ($^-NR^+$) mass spectrometry of bicarbonate and bisulfite ions R7
Bond dissociation energies
Reactions of $C_2H_2^{\cdot+}$ with $CF_3COOC_2H_5$, $ClCH_2CN$ and CH_3OH: the bond energy $D(C_2H–H)$ R21
Bond energies
Multiphoton and electron impact ionization of manganese decacarbonyl $Mn_2(CO)_{10}$ at 351, 248 and 193 nm. Wavelength dependent competition between ionization and dissociation 157

Carbon monoxide
An experimental determination of some double-ionisation energies of carbon monoxide 241
Carboxylic acid derivatives
Differentiation between isomeric 1-aminocyclopropane-1-carboxylic acid derivatives by means of chemical ionisation and mass selected collision induced dissociation 205
Charge inversion spectra
Observation, in mass spectra and in charge-inversion spectra, of the anions of some diatonic species containing B, Si or P atoms R25
Charge reversal
Charge reversal (CR) and neutralization reionization ($^-NR^+$) mass spectrometry of bicarbonate and bisulfite ions R7
Chemical ionization
Differentiation between isomeric 1-aminocyclopropane-1-carboxylic acid derivatives by means of chemical ionisation and mass selected collision induced dissociation 205
Chlorofluorocarbons
Measured and calculated double-ionization energies of the chlorofluoroethane molecules CF_3CF_2Cl, CF_3CFCl_2, CF_3CCl_3, CF_2ClCF_2Cl, $CF_2ClCFCl_2$, CF_2ClCCl_3, $CFCl_2CFCl_2$ and $CFCl_2CCl_3$ 251
CID
A comparison of hybrid and magnetic sector tandem mass spectrometry for ions above m/z 1000 99
Differentiation between isomeric 1-aminocyclopropane-1-carboxylic acid derivatives by means of chemical ionisation and mass selected collision

induced dissociation 205
The fragmentation of proton-bound cluster ions and the gas-phase acidities of alcohols 115
Cluster ions
The fragmentation of proton-bound cluster ions and the gas-phase acidities of alcohols 115
Coincidence studies
Coincidence studies of the slow dissociation reactions of benzene monocations in the 21–35 eV photon energy range 185
Collisional excitation
Collisional excitation of the Meinel and first negative systems of N_2^+ 85

Desorption mechanism
Spontaneous desorption: a secondary ion process 79
Diatomic anions
Observation, in mass spectra and charge-inversion spectra, of the anions of some diatomic species containing B, Si or P atoms R25
Dications
First steps towards a gas-phase acidity ladder for derivatized fullerene dications 145
Dimethyloxonium cation
On the energy barrier for 1,2-elimination of methane from the dimethyloxonium cation R11
Double charge transfer
An experimental determination of some double-ionisation energies of carbon monoxide 241
Measured and calculated double-ionization energies of the chlorofluoroethane molecules CF_3CF_2Cl, CF_3CFCl_2, CF_3CCl_3, CF_2ClCF_2Cl, $CF_2ClCFCl_2$, CF_2ClCCl_3, $CFCl_2CFCl_2$ and $CFCl_2CCl_3$ 251
Observation, in mass spectra and charge-inversion spectra, of the anions of some diatomic species containing B, Si or P atoms R25
Double ionization energies
An experimental determination of some double-ionisation energies of carbon monoxide 241
Measured and calculated double-ionization energies of the chlorofluoroethane molecules CF_3CF_2Cl, CF_3CFCl_2, CF_3CCl_3, CF_2ClCF_2Cl, $CF_2ClCFCl_2$, CF_2ClCCl_3, $CFCl_2CFCl_2$ and $CFCl_2CCl_3$ 251

EI
Characterization of Fourier transform ion cyclotron resonance mass spectrometry for quantitative isotope ratio measurements 223
Measurement of molecular weight distribution of a complex system using mass spectrometry. Part 2. The recovery of fragmentation 215
Endothermic ion/molecule reactions
Effects of reactant ion kinetic energy on both endothermic and exothermic ion/molecule reactions in a quadrupole ion trap mass spectrometer 175
Energy barrier
On the energy barrier for 1,2-elimination of methane from the dimethyloxonium cation R11

Fragmentation
Measurement of molecular weight distribution of a complex system using mass spectrometry. Part 2. The recovery of fragmentation 215
Photoionization dynamics of C_{60} studied with synchrotron radiation R1
FT-ICR
Axial and radial ion cloud compression: coupling of magnetron and cyclotron motion to axial motion in a segmented cubic Fourier transform ion cyclotron resonance ion trap 53
Characterization of Fourier transform ion cyclotron resonance mass spectrometry for quantitative isotope measurements 223
Ionic Lewis superacids in the gas phase. Part 1. Ionic intermediates from the attack of gaseous SiF_3^+ on n-bases 21
Fullerenes
First steps towards a gas-phase acidity ladder for derivatized fullerene dications 145
Photoionization dynamics of C_{60} studied with synchrotron radiation R1

Gas phase ion chemistry
Ionic Lewis superacids in the gas phase. Part 1. Ionic intermediates from the attack of gaseous SiF_3^+ on n-bases 21
Gaseous Lewis superacids
Ionic Lewis superacids in the gas phase. Part 1. Ionic intermediates from the attack of gaseous SiF_3^+ on n-bases 21
Gaseous protonated silicic acids
Ionic Lewis superacids in the gas phase. Part 1. Ionic intermediates from the attack of gaseous SiF_3^+ on n-bases 21

Heteroclusters
Intracluster ion/molecule reactions in acetylene and water systems 11
High mass
A comparison of hybrid and magnetic sector tandem mass spectrometry for ions above m/z 1000 99
Evaluation of storage of ions over m/z 1000 in an ion trap mass spectrometer 1
Hybrid
A comparison of hybrid and magnetic sector tandem mass spectrometry for ions above m/z 1000 99

Intraclusters

Intracluster ion/molecule reactions in acetylene and water systems 11
Ion cloud compression
Axial and radial ion cloud compression: coupling of magnetron and cyclotron motion to axial motion in a segmented cubic Fourier transform ion cyclotron resonance ion trap 53
Ion transmission probability
A time-of-flight mass spectrometer with an accelerating field in the reflecting system 37
Ion trap
Axial and radial ion cloud compression: coupling of magnetron and cyclotron motion to axial motion in a segmented cubic Fourier transform ion cyclotron resonance ion trap 53
Evaluation of storage of ions over m/z 1000 in an ion trap mass spectrometer 1
The non-linear resonance ion trap. Part 2. A general theoretical analysis 125
Ion/molecule reactions
Intracluster ion/molecule reactions in acetylene and water systems 11
Isomer differentiations
Differentiation between isomeric 1-aminocyclopropane-1-carboxylic acid derivatives by means of chemical ionisation and mass selected collision induced dissociation 205
Isotope ratio measurements
Characterization of Fourier transform ion cyclotron resonance mass spectrometry for quantitative isotope ratio measurements 223

Kinetic energy
Effects of reactant ion kinetic energy on both endothermic and exothermic ion/molecule reactions in a quadrupole ion trap mass spectrometer 175

Laser ionization
Characterization of Fourier transform ion cyclotron resonance mass spectrometry for quantitative isotope ratio measurements 223
Laser ionisation studies of nitroaromatic and NO_x (x = 1 or 2) molecules in the region 224–238 nm R15

Meinel systems
Collisional excitation of the Meinel and first negative systems of N_2^+ 85
Metastable atom beam
Selective fragmentation and ionization of organic compounds using an energy-tunable rare-gas metastable beam source 69
Metastable decay
Multiphoton and electron impact ionization of manganese decacarbonyl $Mn_2(CO)_{10}$ at 351, 248 and 193 nm. Wavelength dependent competition between ionization and dissociation 157
Metastable ions
Coincidence studies of the slow dissociation reactions of benzene monocations in the 21–35 eV photon energy range 185
Methane loss
On the energy barrier for 1,2-elimination of methane from the dimethyloxonium cation R11
Molecular weight distribution
Measurement of molecular weight distribution of a complex system using mass spectrometry. Part 2. The recovery of fragmentation 215
Multiphoton ionization dissociation
Multiphoton and electron impact ionization of manganese decacarbonyl $Mn_2(CO)_{10}$ at 351, 248 and 193 nm. Wavelength dependent competition between ionization and dissociation 157
Multipole fields
The non-linear resonance ion trap. Part 2. A general theoretical analysis 125

N_2^+
Collisional excitation of the Meinel and first negative systems of N_2^+ 85
Neutralization–reionization
Charge reversal (CR) and neutralization reionization ($^-NR^+$) mass spectrometry of bicarbonate and bisulfite ions R7
Nitroaromatic
Laser ionisation studies of nitroaromatic and NO_x (x = 1 or 2) molecules in the region 224–238 nm R15
NO
Laser ionisation studies of nitroaromatic and NO_x (x = 1 or 2) molecules in the region 224–238 nm R15
Non-linear resonance
The non-linear resonance ion trap. Part 2. A general theoretical analysis 125

Paul trap
Phase space analysis of the ion cloud in the second stability region of the Paul trap 89
Penning ionization
Selective fragmentation and ionization of organic compounds using an energy-tunable rare-gas metastable beam source 69
Phase-space dynamics
Phase space analysis of the ion cloud in the second stability region of the Paul trap 89
Photoionization
Coincidence studies of the slow dissociation reactions of benzene monocations in the 21–35 eV photon energy range 185
Photoionization dynamics of C_{60} studied with syn-

chrotron radiation R1
Proton affinity
Reactions of $C_2H_2^{\bullet+}$ with $CF_3COOC_2H_5$, $ClCH_2CN$ and CH_3OH: the bond energy $D(C_2H–H)$ R21
Proton transfer
First steps towards a gas-phase acidity ladder for derivatized fullerene dications 145
Purine bases
Surface ionization mass spectrometry of biomolecules: amino acids, purine bases, alkaloids 45

Quadrupole ion trap
Effects of reactant ion kinetic energy on both endothermic and exothermic ion/molecule reactions in a quadrupole ion trap mass spectrometer 175

Reflecting system
A time-of-flight mass spectrometer with an accelerating field in the reflecting system 37

Selective fragmentation/ionization
Selective fragmentation and ionization of organic compounds using an energy-tunable rare-gas metastable beam source 69
SIFT
First steps towards a gas-phase acidity ladder for derivatized fullerene dications 145
Reactions of $C_2H_2^{\bullet+}$ with $CF_3COOC_2H_5$, $ClCH_2CN$ and CH_3OH: the bond energy $D(C_2H–H)$ R21
Spontaneous desorption
Spontaneous desorption: a secondary ion process 79
Storage efficiency
Evaluation of storage of ions over m/z 1000 in an ion trap mass spectrometer 1
Surface ionization
Surface ionization mass spectrometry of biomolecules: amino acids, purine bases, alkaloids 45

Tandem mass spectrometry
A comparison of hybrid and magnetic sector tandem mass spectrometry for ions above m/z 1000 99
Time of flight
A time-of-flight mass spectrometer with an accelerating field in the reflecting system 37
Coincidence studies of the slow dissociation reactions of benzene monocations in the 21–35 eV photon energy range 185
Spontaneous desorption: a secondary ion process 79
Time-energy focusing
A time-of-flight mass spectrometer with an accelerating field in the reflecting system 37
Translational energy spectroscopy
Collisional excitation of the Meinel and first negative systems of N_2^+ 85
Trifluorosilyl cation
Ionic Lewis superacids in the gas phase. Part 1. Ionic intermediates from the attack of gaseous SiF_3^+ on n-bases 21
Tunable-energy
Selective fragmentation and ionization of organic compounds using an energy-tunable rare-gas metastable beam source 69
